

Privacy Policy

TimeLeftApp, developed by George Stupakov, is a free app that allows users to create events and see a countdown to them.

This app does not collect any personal information. All event data (names, dates, notifications) is stored locally on your device. TimeLeftApp does not use analytics, ads, or share any user data with third parties.

The app uses local notifications and widgets to show countdowns. No data is sent to the internet.
